Elevate Every Sound Experience

Stewart Audio is a worldwide leader in the commercial amplifier and control market. We provide a comprehensive suite of audio products for corporate and education customers that need ultra-reliable amplifiers and intuitive, state-of-the-art controls.

The deep technical and design expertise of our engineering team delivers an audio experience that meets the stringent and evolving requirements of our customers.

Hear Us Around the World

Stewart Audio is recognized across globe for its contributions to Networked Audio Amplifiers and DSP in the commercial install market.

We offer custom design services for a wide variety of audio products which leverage our innovative designs that span Networked Audio (including Dante, CobraNet, & AVB) Amplifiers and DSP to meet your unique needs.

Fill Your World with Our Sound

Stewart Audio amplifiers are engineered from the ground up to deliver spectacular sound to a wide variety of environments – from conference rooms to coffee shops.

Our amplifiers bridge the gap between convenience and outstanding audio performance, making it an essential component for any location where sound matters.

World-class Support

Our world-class engineering team provides the support and insights you need to reduce installation complexity and accelerate the delivery of our audio services for our customers.

From planning to installation, our experts are there to help you every step of the way to optimize your user experience and maximize the return of your audio investment. We are intensely focused on how we can satisfy our clients again and again.
